Assignment
Advanced DBMS and Administration

Unit - 1

Q. Explain Function dependency in details.
Q. What is normalization? Explain Different forms with example.
Q. Explain different type of keys.
Q. What is query processing? Explain Query processing stages in details.
Q. Explain method for joining tables.

Unit – 2

Q. What is Serializibility? Explain type of serializibility.
Q. Explain state of transaction with diagram.
Q. Explain schedules and types.
Q. Describe deadlock in details.
Q. What is Application Partitioning? Explain its types.
Q. Explain DBMS architecture.

Unit -3

Q. Explain the concept of buffer management.
Q. write about tablespace in crash recovery.
Q. What is backup in oracle? Explain recovery strategies.
Q. Explain control file and redo log files.

Unit – 4

Q. Explain buffer cache and redo logs buffer.
Q. Explain database integrity.
Q. Database configuration and I/O issues.
